Education

Southern Utah University

Utah **BS, Computer Science**
Aug 2018 *Summa Cum Laude*
- Apr 2020 Grade-Point Average: 4.0/4.0

Snow College

Utah **AS, Computer Science**
Aug 2015 *Summa Cum Laude*
- Apr 2018 Grade-Point Average: 3.93/4.0

Experience

What If Media Group

Full-time **Senior Data Engineer**
Sep 2025 - Present

- Own the Airflow deployments and implement solutions to collect / receive data from multiple sources (webhooks, APIs, etc.)
- Engineer internal process improvements, including automating manual processes for optimizing data delivery and increasing cost savings

Full-time **Data Engineer III**
Mar 2024 - Sep 2025

- Work with multiple teams to create accurate and efficient data pipelines using Snowflake, Databricks, and Apache Airflow

1010data (Part of SymphonyAI)

Full-time **Lead Software Development Engineer**
Mar 2023 - Feb 2024

- Lead a team in developing and implementing streaming and event-based software using Apache Kafka
- Develop event-based tools and resources for use in data pipelines by Data Engineers

Full-time **Data Engineer III**
May 2022 - Mar 2023

- Develop and maintain ETL data pipelines using Apache Airflow
- Develop software to streamline, automate, and centralize development practices and code resources

Full-time **Data Engineer I**
Nov 2021 - May 2022

- Develop and maintain ETL data pipelines using Apache Airflow
- Work with multiple teams to streamline, automate, and centralize development practices and code resources

PhoneSoap

Full-time **Business Intelligence Engineer**
Nov 2020 - Oct 2021

- Developed software to clean and load data from various sources
- Created visualizations and reports to assist in making data-supported business decisions

Contract **Business Intelligence Consultant**
Jul 2020 - Oct 2020

- Used various ETL technologies to collect data from various ad and eCommerce sources and load them into a data warehouse for centralized reporting

GuardSight, Inc.

Intern **Software Engineer / Data Analyst**
Jan 2020 - Apr 2020

- Developed a data analytics tool and plotting engine in Python3 to visualize historic cybersecurity events, show anomalies in historic data, and predict/detect anomalies in live data
